Sound Design

The sound design supports the emotional effect of your Film, Spot or website, it's all about keeping dialogs, sound effects & music maintained with the correct balance. After many years of experience DMZ Music has built an incredible archive of sounds and effects to be used on our projects.

Recording & Editing

The quality of every recorded instrument or single signal is crucial for the quality of the final product. DMZ Music owns a large collection of high class studio microphones, "Class A" equipment, and professional recording systems. What makes our productions stand out from others is a modern arrangement combined with an outstanding performance of our musicians. Our engineers are always supporting the artists throughout the recording process watching out for musical faults and ensure the best possible performance.

Editing isn't really a creative producer's favorite, therefore, DMZ Music has a separate team, specialized on this part of the production process. High quality editing can lift any production in to a whole new level of how music is being experienced. Editing involves noise removing, selection of the best recorded parts as well as cuts, timing, pitching & tuning.

Vocal Recording, Sync & Voiceover

DMZ Music offers vocal recording for the following genres: Radio & TV Adverts, Video Games, Dialogs, Phone announcements & Mailboxes in all formats & languages. We have a huge database of professional speakers to provide a suitable voice for every project in every language.

Mixing 2.0 to 5.1

The mixdown of audio and film productions inquires a high level of know how, experience & creativity.

We at DMZ Music always involve the visions and individuality of the artists within our mixdowns and recruit the artists ideas with our authority to achieve the best possible & genre typical sound. Song & Artist are our main priorities.

Mastering & DDP

Beside the 2-Track Mastering, DMZ Music is also offering a complete mixdown & Mastering solution as well as Stem Mastering. During this process, our engineers correcting frequencies, editing dynamics & volumes and stereo imaging to generate the best possible result for each type of sound. To finalize the Product we produce DDP CD Master & DDP Image. Master technique can be the client's choice, as we know these days Dynamics Preservation vs. Loudness Wars is a personal taste.

Licensing, Clearing & Publishing

If you wish to license, for one of your future projects, one of already existing songs, hit record etc., we have a 15 years' experience in Music Publishing & clearing worldwide.
